Monthly Message

The Wuthrich & Co. Composite was up 0.3% in November. This compares with the S&P/TSX up 1.4% and the BMO Small Cap Index down 3.7%.

The Wuthrich & Co. Portfolio did a u-ey in November. With only four days left in the month we were down 4.1%. By month's end, we were up 0.3%! All of this happened with no change in the fundamentals of the companies in our portfolio. In fact, we finished reviewing quarterly earnings reports in November and, with perhaps one or two exceptions, the results were good, and in some cases very good. With the extraordinary market swings experienced in October and November of this year we have found some cheaper valuations amongst names that we look at. This has allowed us to add to a few of our favourite positions. Cash is now about 5% and we would like to bring it even lower in the coming weeks.

JF and Wil would like to thank all of you who made the **Wuthrich & Co. Annual Update** held at the Mount Stephen Hotel on November 15 another great success.

Lastly, we would like to wish all our clients and friends a very Merry Christmas and all the very best in the New Year.

Wutherich & Co. Factsheet

Company Objective

Our goal is to seek prosperity for our clients through participation in stable, growing companies in North America, led by strong management teams that we consider our partners for the next five or more years.

Investment Philosophy

Our style can be described as concentrated, disciplined, long-term growth stock investing. The focus is on established companies that generally have a demonstrated track record in revenue, cash flow or earnings per share growth, with strong managements and solid balance sheets. The current emphasis in the portfolio is on the equity of small to medium capitalization companies, defined roughly as \$50 million to \$5 billion in market capitalization. The portfolio may include large capitalization companies if the right elements are there. Stocks are bought with a keen eye to valuation, so you're not likely to find many high multiple stocks here. The portfolio will likely maintain a significant percentage in foreign securities, providing exposure to investment returns outside of Canada.

*The Wutherich & Co. performance shown here (using the Time Weighted Rate of Return method) is of a composite which combines the performance of all of the accounts managed by Wutherich & Co. that have been invested according to the Wutherich & Co. Portfolio throughout their history. These accounts vary greatly in the size of assets that they contain and whether or not fees have been deducted directly from the accounts during their history. BMOSCI-wtd = BMO Small Cap Index, Total Return, weighted. This index is currently the most comparable to the Wutherich & Co. portfolio due to its average market capitalization, though it may differ greatly in its sector weightings; TSX = S&P/TSX Total Return Index. Due to its large capitalization nature and substantially different sector weightings, this index may not be considered comparable to the Wutherich & Co. Portfolio.
