The Wuthrich & Co. Composite was up 0.7% in October. This compares with the S&P/TSX down 0.9% and the BMO Small Cap Index down 2.0%.

The Wuthrich & Co. Composite eked out a small gain in October and is now up 16.8% year-to-date. Valuations in our portfolio still look strikingly cheap and we continue to carry a minimal amount of cash.

For the first time in as long as we can remember, we have no US names in the portfolio. There are many that we look at but, in most cases, find it hard to justify their valuations. We still have plenty of US exposure through the Canadian names that we own, but at much cheaper prices. One trader that we talk to referred to a buyers' strike amongst Canadian small Cap managers, regardless of how cheap the names appear. Though it can test our patience, we can wait this out. We are happily buying names that we believe in, and at great prices. Value will out eventually.

Wutherich & Co. Factsheet

Company Objective

Our goal is to seek prosperity for our clients through participation in stable, growing companies in North America, led by strong management teams that we consider our partners for the next five or more years.

Investment Philosophy

Our style can be described as concentrated, disciplined, long-term growth stock investing. The focus is on established companies that generally have a demonstrated track record in revenue, cash flow or earnings per share growth, with strong managements and solid balance sheets. The current emphasis in the portfolio is on the equity of small to medium capitalization companies, defined roughly as \$50 million to \$5 billion in market capitalization. The portfolio may include large capitalization companies if the right elements are there. Stocks are bought with a keen eye to valuation, so you're not likely to find many high multiple stocks here. The portfolio will likely maintain a significant percentage in foreign securities, providing exposure to investment returns outside of Canada.

*The Wutherich & Co. performance shown here (using the Time Weighted Rate of Return method) is of a composite which combines the performance of all of the accounts managed by Wutherich & Co. that have been invested according to the Wutherich & Co. Portfolio throughout their history. These accounts vary greatly in the size of assets that they contain and whether or not fees have been deducted directly from the accounts during their history. BMOSCI-wtd = BMO Small Cap Index, Total Return, weighted. This index is currently the most comparable to the Wutherich & Co. portfolio due to its average market capitalization, though it may differ greatly in its sector weightings; TSX = S&P/TSX Total Return Index. Due to its large capitalization nature and substantially different sector weightings, this index may not be considered comparable to the Wutherich & Co. Portfolio.
