The Wutherich & Co. Composite was up 11.7% in August. This compares with the S&P/TSX, up 2.3%. For the time being, we are not including a comparison with the small cap index. The provider is looking to charge more for the data than we are willing to pay. If you know anything about JF and I, you know that we are far too cheap to pay a lot of money for something that is "nice to have", not "need to have".

As for August, okay, that was a pretty good month for the Wutherich & Co. Portfolio. In fact, it was by far our best August on record! Most of our names have recently reported quarterly results and, for the most part, the numbers have been excellent. Yes, their operations have been disrupted by the coronavirus but most of them continue to grow and generate cash. The good results are helping the portfolio gradually climb back to fair value, though we recognize that we still have a long way to go. The severe downturn that we experienced in February and March was unwarranted. Sure, we are living in unprecedented times but there will always be human needs for certain goods and services. We will always consume beer, use telecom equipment, get colonoscopies, take out consumer loans, buy sports shoes, visit convenience stores and do much, much more. We recognize that it might be very difficult for the next few years to overcome the effects of the coronavirus, but value will out. Over time, our portfolio should reflect the strength of our names. Rather than own four or five marquee stocks that are really driving the indexes right now, we will continue to own a diverse selection of high quality, growing companies that should see excellent price appreciation over time.

Wutherich & Co. Factsheet

Company Objective

Our goal is to seek prosperity for our clients through participation in stable, growing companies in North America, led by strong management teams that we consider our partners for the next five or more years.

Investment Philosophy

Our style can be described as concentrated, disciplined, long-term growth stock investing. The focus is on established companies that generally have a demonstrated track record in revenue, cash flow or earnings per share growth, with strong managements and solid balance sheets. The current emphasis in the portfolio is on the equity of small to medium capitalization companies, defined roughly as \$50 million to \$5 billion in market capitalization. The portfolio may include large capitalization companies if the right elements are there. Stocks are bought with a keen eye to valuation, so you're not likely to find many high multiple stocks here. The portfolio will likely maintain a significant percentage in foreign securities, providing exposure to investment returns outside of Canada.

Your account with us

Wutherich & Company is an independent investment counsellor. We do not hold assets for our clients, but simply exercise trades over your account as per an agreed upon investment policy statement and portfolio management agreement. Your account is held at [National Bank Independent Network](#) in your name. Withdrawals from that account can only be sent to you at your designated bank account and/or address of record. Wutherich & Co. may also do withdrawals from your account to satisfy any fees that may apply to your account. All accounts are cash accounts. Unlike hedge funds, we do not use leverage or derivatives to manage your money. Also, we are not a fund company – if you are a private investor with us, your account will mirror the Model Portfolio but your investments are not pooled.

*The Wutherich & Co. performance shown here (using the Time Weighted Rate of Return method) is of a composite which combines the performance of all of the accounts managed by Wutherich & Co. that have been invested according to the Wutherich & Co. Portfolio throughout their history. These accounts vary greatly in the size of assets that they contain and whether or not fees have been deducted directly from the accounts during their history. BMOSCI-wtd = BMO Small Cap Index, Total Return, weighted. This index is currently the most comparable to the Wutherich & Co. portfolio due to its average market capitalization, though it may differ greatly in its sector weightings; TSX = S&P/TSX Total Return Index. Due to its large capitalization nature and substantially different sector weightings, this index may not be considered comparable to the Wutherich & Co. Portfolio.
