Monthly Message

The Wutherich & Co. Composite was up 4.2% in March. This compares with the S&P/TSX being up 4.0%.

Though March showed a small recovery, geopolitical and macro-economic factors continue to weigh on the markets and the Wutherich & Company Portfolio. Our way to counter that is to focus on the prospects of the individual names that we invest in. We have talked to most of our companies in the last few weeks after they reported their recent quarters. While they all feel some level of strain, few have experienced any serious impediments. While many of our companies face a mix of challenges, they feel that these can be surmounted and that they can continue to pursue long-term growth. After taking a hard look at all our numbers, some of our names are trading at the cheapest valuations that we have ever seen. Barring geopolitical disaster, we think that this sets us up for good long-term returns. It will just require a little patience to see us through these times.

The following table illustrates the performance of the Wutherich & Co. Composite to the present:

Wutherich & Co. Factsheet

Company Objective

Our goal is to seek prosperity for our clients through participation in stable, growing companies in North America, led by strong management teams that we consider our partners for the next five or more years.

Investment Philosophy

Our style can be described as concentrated, disciplined, long-term growth stock investing. The focus is on established companies that generally have a demonstrated track record in revenue, cash flow or earnings per share growth, with strong managements and solid balance sheets. The current emphasis in the portfolio is on the equity of small to medium capitalization companies, defined roughly as \$50 million to \$5 billion in market capitalization. The portfolio may include large capitalization companies if the right elements are there. Stocks are bought with a keen eye to valuation, so you're not likely to find many high multiple stocks here. The portfolio will likely maintain a significant percentage in foreign securities, providing exposure to investment returns outside of Canada.

*The Wutherich & Co. performance shown here (using the Time Weighted Rate of Return method) is of a composite which combines the performance of all of the accounts managed by Wutherich & Co. that have been invested according to the Wutherich & Co. Portfolio throughout their history. These accounts vary greatly in the size of assets that they contain and whether or not fees have been deducted directly from the accounts during their history. TSX = S&P/TSX Total Return Index. Due to its large capitalization nature and substantially different sector weightings, this index may not be considered comparable to the Wutherich & Co. Portfolio.
