The Wutherich & Co. Composite was up 2.5% in November. This compares with the S&P/TSX being up 5.5%.

To respect the choreography, November should have been two steps back. New dance? New dance partner? Hopefully one that doesn't step on our toes quite so much. What steps do we need to learn to stay at the party? The truth is, we have stuck with the same dance for decades and don't see ourselves changing this...ever. We like to think of it as a graceful waltz around the ballroom floor, though it may, from time to time, feel more like the Ballroom Blitz. All that to say, our investment approach has never changed, nor will it.

Most of our companies have reported their most recent quarters in the last weeks. The results have been, for the most part, very good. These strong fundamentals provide the foundation for strong long-term returns.

JF and I would also like to invite you to our Annual Update, taking place at Le Mount Stephen on January 18, "live" and "in person". Please contact us at 514-924-4438 or jf@wutherich.ca.

## Company Objective

Our goal is to seek prosperity for our clients through participation in stable, growing companies in North America, led by strong management teams that we consider our partners for the next five or more years.

## Investment Philosophy

Our style can be described as concentrated, disciplined, long-term growth stock investing. The focus is on established companies that generally have a demonstrated track record in revenue, cash flow or earnings per share growth, with strong managements and solid balance sheets. The current emphasis in the portfolio is on the equity of small to medium capitalization companies, defined roughly as \$50 million to \$5 billion in market capitalization. The portfolio may include large capitalization companies if the right elements are there. Stocks are bought with a keen eye to valuation, so you're not likely to find many high multiple stocks here. The portfolio will likely maintain a significant percentage in foreign securities, providing exposure to investment returns outside of Canada.

\*The Wutherich & Co. performance shown here (using the Time Weighted Rate of Return method) is of a composite which combines the performance of all of the accounts managed by Wutherich & Co. that have been invested according to the Wutherich & Co. Portfolio throughout their history. These accounts vary greatly in the size of assets that they contain and whether or not fees have been deducted directly from the accounts during their history. TSX = S&P/TSX Total Return Index. Due to its large capitalization nature and substantially different sector weightings, this index may not be considered comparable to the Wutherich & Co. Portfolio.
