The Wutherich & Co. Composite was up 2.8% in April. This compares with the S&P 500, up 1.0%, the DJIA up 0.4%, the NASDAQ up 0.8%, the S&P/TSX up 2.4%, while the BMO Small Cap Index was up 4.9%.

For all the grief our Energy names have given us over the past year, they have given us some joy in the last few months. How long this lasts, we don't know. We are always testing the viability of the companies in our portfolio and in general, they look quite good. We still have plenty of cash and would love it if investors "Sell in May and Go Away", as the old adage advises. We would be happy to buy some of their better quality, long-term growth names.

## Company Objective

Our goal is to seek prosperity for our clients through participation in stable, growing companies in North America, led by strong management teams that we consider our partners for the next five or more years.

## Investment Philosophy

Our style can be described as concentrated, disciplined, long-term growth stock investing. The focus is on established companies that generally have a demonstrated track record in revenue, cash flow or earnings per share growth, with strong managements and solid balance sheets. The current emphasis in the portfolio is on the equity of small to medium capitalization companies, defined roughly as \$50 million to \$5 billion in market capitalization. The portfolio may include large capitalization companies if the right elements are there. Stocks are bought with a keen eye to valuation, so you're not likely to find many high multiple stocks here. The portfolio will likely maintain a significant percentage in foreign securities, providing exposure to investment returns outside of Canada.

\*The Wutherich & Co. performance shown here is of a composite which combines the performance of all of the accounts managed by Wutherich & Co. that have been invested according to the Wutherich & Co. Portfolio throughout their history. These accounts vary greatly in the size of assets that they contain and whether or not fees have been deducted directly from the accounts during their history. BMO SSCI-wtd = BMO Small Cap Index, Total Return, weighted. This index is currently the most comparable to the Wutherich & Co. portfolio due to its average market capitalization, though it may differ greatly in its sector weightings; TSX = S&P/TSX Total Return Index. Due to its large capitalization nature and substantially different sector weightings, this index may not be considered comparable to the Wutherich & Co. Portfolio.
