Wil Wutherich, President, B.Sc., MBA: Over twenty-four years as an equity analyst and portfolio manager with Standard Life, Van Berkomp & Associates and Wutherich & Co.

Monthly Message

The Wutherich & Co. Composite was down 2.2% in January. This compares with the S&P/TSX up 0.8%, the BMO Small Cap Index up 2.0%, S&P 500 (US\$) up 1.9%, the DJIA (US\$) up 0.6%, while the NASDAQ (US\$) was up 4.3%.

The weakness experienced in the Wutherich & Co. Composite during January happened in the last few days of the month. Two forces may have been at work. Many of the stocks in our portfolio that had a strong run from August to December saw heavy selling, on no news, towards the end of January. We also had one company get hit severely on company specific news. New Gold announced that a large development project is running behind schedule and is over budget. So much over budget that the company may face a liquidity crisis later this year. We have eliminated this position after suffering a negative impact on the portfolio of about 1.2% during the month. Our position in Directcash Payments was also eliminated during January, though this was due to the happy completion of its acquisition by Cardtronics.

We think it is very important to ignore day-to-day, month-to-month or even year-to-year movements in stock prices. Rather, we focus on company fundamentals and how we value the individual names in the portfolio. While we will have trouble stocks like New Gold show up in our portfolio from time to time, we believe we will have more happy endings like Directcash Payments to help generate positive long-term returns.

Wutherich & Co. Factsheet

Company Objective

Our goal is to seek prosperity for our clients through participation in stable, growing companies in North America, led by strong management teams that we consider our partners for the next five or more years.

Investment Philosophy

Our style can be described as concentrated, disciplined, long-term growth stock investing. The focus is on established companies that generally have a demonstrated track record in revenue, cash flow or earnings per share growth, with strong managements and solid balance sheets. The current emphasis in the portfolio is on the equity of small to medium capitalization companies, defined roughly as \$50 million to \$5 billion in market capitalization. The portfolio may include large capitalization companies if the right elements are there. Stocks are bought with a keen eye to valuation, so you're not likely to find many high multiple stocks here. The portfolio will likely maintain a significant percentage in foreign securities, providing exposure to investment returns outside of Canada.

*The Wutherich & Co. performance shown here (using the Time Weighted Rate of Return method) is of a composite which combines the performance of all of the accounts managed by Wutherich & Co. that have been invested according to the Wutherich & Co. Portfolio throughout their history. These accounts vary greatly in the size of assets that they contain and whether or not fees have been deducted directly from the accounts during their history. BMOSCI-wtd = BMO Small Cap Index, Total Return, weighted. This index is currently the most comparable to the Wutherich & Co. portfolio due to its average market capitalization, though it may differ greatly in its sector weightings; TSX = S&P/TSX Total Return Index. Due to its large capitalization nature and substantially different sector weightings, this index may not be considered comparable to the Wutherich & Co. Portfolio.
