The Wutherich & Co. Composite was up 0.3% in July. This compares with the S&P/TSX up 1.1% and the BMO Small Cap Index down 1.0%.

Here's to number one! It has been a little while since we have been there, so we will crow about it while we can. We submit numbers to Pavilion (formerly Brockhouse Cooper), a service that measures our performance relative to a group of peers that participate in the small cap space. The report shows that, as of June 2018, we are ranked **Number 1** in Canada on a one-year basis and **Number 3** on a two year basis (both are gross of fees). Hats off to our clients who had stuck with us during our downturn from 2014 to 2016. Stay tuned, we will come back to you next week with additional colour on the results shown in this report.

In July, the Wutherich & Co. Portfolio slipped sideways on little news. Only 4 of our 17 names have reported quarterly earnings so far. Three out of four were strong with one being somewhat disappointing. We expect to have a lot more news during the month of August as the rest of our companies report. As we mentioned last month, we will be using the balance of the year to eliminate some weak names and add to some of the stronger positions in the portfolio. We have been searching intensively for new names to add to the portfolio over the last several months. A few ideas have come to our attention but valuation continues to be a big hurdle. Any company of quality with good growth prospects comes with a very high price tag. We will keep research files on these and hope to have an opportunity to buy them at some point in the future.

The following table illustrates the performance of the Wutherich & Co. Composite to the present:

## Wutherich & Co. Factsheet

## Company Objective

Our goal is to seek prosperity for our clients through participation in stable, growing companies in North America, led by strong management teams that we consider our partners for the next five or more years.

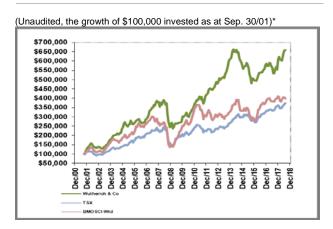

## **Investment Philosophy**

Our style can be described as concentrated, disciplined, long-term growth stock investing. The focus is on established companies that generally have a demonstrated track record in revenue, cash flow or earnings per share growth, with strong managements and solid balance sheets. The current emphasis in the portfolio is on the equity of small to medium capitalization companies, defined roughly as \$50 million to \$5 billion in market capitalization. The portfolio may include large capitalization companies if the right elements are there. Stocks are bought with a keen eye to valuation, so you're not likely to find many high multiple stocks here. The portfolio will likely maintain a significant percentage in foreign securities, providing exposure to investment returns outside of Canada.

\*The Wutherich & Co. performance shown here (using the Time Weighted Rate of Return method) is of a composite which combines the performance of all of the accounts managed by Wutherich & Co. that have been invested according to the Wutherich & Co. Portfolio throughout their history. These accounts vary greatly in the size of assets that they contain and whether or not fees have been deducted directly from the accounts during their history. BMOSCI-wtd = BMO Small Cap Index, Total Return, weighted. This index is currently the most comparable to the Wutherich & Co. portfolio due to its average market capitalization, though it may differ greatly in its sector weightings; TSX = S&P/TSX Total Return Index. Due to its large capitalization nature and substantially different sector weightings, this index may not be considered comparable to the Wutherich & Co. Portfolio.
