Wil Wutherich, President, B.Sc., MBA: Over thirty-one years as an equity analyst and portfolio manager with Standard Life, Van Berkomp & Associates and Wutherich & Co.

Monthly Message

The Wutherich & Co. Composite was up 7.8% in July. This compares with the S&P/TSX being up 2.6%.

“Everything else” has made a bit of a comeback.

Last month, we referred to how the market was focused on just a handful of mega-cap technology/Artificial Intelligence (AI) names and largely ignored everything else. We owned a sub-set of “everything else”. For now, the market has broadened its focus and the Wutherich & Co. Portfolio has benefited.

The hype-cycle around mega-cap technology/AI may continue but this won’t cause us to change our focus one bit. The more giddy the market becomes, the more grounded we are in the fundamentals of the names that we own, and we happen to think that we own a stable of outstanding names.

Most of our companies will be reporting earnings in the coming weeks. While a few might disappoint, we have a high level of conviction that most will continue to demonstrate the ongoing strength of their businesses.

The following table illustrates the performance of the Wutherich & Co. Composite to the present:

Wutherich & Co. Factsheet

Company Objective

Our goal is to seek prosperity for our clients through participation in stable, growing companies in North America, led by strong management teams that we consider our partners for the next five or more years.

Investment Philosophy

Our style can be described as concentrated, disciplined, long-term growth stock investing. The focus is on established companies that generally have a demonstrated track record in revenue, cash flow or earnings per share growth, with strong managements and solid balance sheets. The current emphasis in the portfolio is on the equity of small to medium capitalization companies, defined roughly as \$50 million to \$5 billion in market capitalization. The portfolio may include large capitalization companies if the right elements are there. Stocks are bought with a keen eye to valuation, so you're not likely to find many high multiple stocks here. The portfolio will likely maintain a significant percentage in foreign securities, providing exposure to investment returns outside of Canada.

*The Wutherich & Co. performance shown here (using the Time Weighted Rate of Return method) is of a composite which combines the performance of all of the accounts managed by Wutherich & Co. that have been invested according to the Wutherich & Co. Portfolio throughout their history. These accounts vary greatly in the size of assets that they contain and whether or not fees have been deducted directly from the accounts during their history.
