Monthly Message

For September, the Wutherich & Co. Composite was up 0.6%.

The portfolio has been lumbering along this year, in contrast to the spritely gains of the overall Canadian market. The key difference? We have no Gold or Base Metal stocks. We haven't invested in these sectors in many years. Historically, they have provided poor returns and have few of the investment traits that we hold dear. Our strong, long-term returns have done just fine without their contribution, so you are not likely to see many changes here. On top of this, we have had weakness in two of our Financials positions, namely, goeasy (GSY-T) and Propel Holdings (PRL-T). This was driven by a short-seller's report on GSY, a long time holding of ours. The company and several analysts have rebutted each of the short-seller's points. The situation bears monitoring and we will make adjustments accordingly.

The balance of the portfolio continues to look very strong with most of our names handling Trump Chaos 2.0 with aplomb. That said, ongoing stress from political turmoil will have some effect on our companies over time. We'll monitor this impact and make adjustments to the portfolio, as necessary. In the meantime, we are starting to pick away at several positions that we think are cheap and offer a strong, resilient path to long-term gains.

The following table illustrates the performance of the Wutherich & Co. Composite to the present:

Wutherich & Co. Factsheet

Company Objective

Our goal is to seek prosperity for our clients through participation in stable, growing companies in North America, led by strong management teams that we consider our partners for the next five or more years.

Investment Philosophy

Our style can be described as concentrated, disciplined, long-term growth stock investing. The focus is on established companies that generally have a demonstrated track record in revenue, cash flow or earnings per share growth, with strong managements and solid balance sheets. The current emphasis in the portfolio is on the equity of small to medium capitalization companies, defined roughly as \$50 million to \$5 billion in market capitalization. The portfolio may include large capitalization companies if the right elements are there. Stocks are bought with a keen eye to valuation, so you're not likely to find many high multiple stocks here. The portfolio will likely maintain a significant percentage in foreign securities, providing exposure to investment returns outside of Canada.

Your account with us

Wutherich & Company is an independent investment counsellor. We do not hold assets for our clients, but simply exercise trades over your account as per an agreed upon investment policy statement and portfolio management agreement. Your account is held at [National Bank Independent Network](#) in your name. Withdrawals from that account can only be sent to you at your designated bank account and/or address of record. Wutherich & Co. may also do withdrawals from your account to satisfy any fees that may apply to your account. All accounts are cash accounts. Unlike hedge funds, we do not use leverage or derivatives to manage your money. Also, we are not a fund company – if you are a private investor with us, your account will mirror the Model Portfolio but your investments are not pooled.

*The Wutherich & Co. performance shown here (using the Time Weighted Rate of Return method) is of a composite which combines the performance of all the accounts managed by Wutherich & Co. that have been invested according to the Wutherich & Co. Portfolio throughout their history. These accounts vary greatly in the size of assets that they contain and whether or not fees have been deducted directly from the accounts during their history. TSX-TR = S&P/TSX Total Return Index. Due to its large capitalization nature and substantially different sector weightings, this index may not be considered comparable to the Wutherich & Co. Portfolio. As the Wutherich & Co. portfolio does not compare directly with any known indices, we show the S&P/TSX index only as a reference for the overall Canadian stock market and should not be considered as a direct comparison to what we do.
