Happy August Long Weekend!

For July, the Wuthrich & Co. Composite was down 0.3%.

This time of year, many Canadians are at their cottage/cabin on the lake. In this spirit, the Wuthrich & Company Composite treaded water for July. For the time being, not much is pushing our names up or down.

We said good-bye to Blackline Safety in July. Yet another great Canadian small cap industrial/technology company gets taken private. We've seen a lot of this over the last year or so. We haven't fully replaced the position yet but are looking at many candidates. While there are many excellent prospects to choose from, the challenge is valuation. Anything of quality already comes at a high price. We always have the option of upping our current positions as we have many excellent names currently in the portfolio. Most of them are strong, profitable, sustainable growers that should compound for us for years to come.

The following table illustrates the performance of the Wuthrich & Co. Composite to the present:

Wutherich & Co. Factsheet

Company Objective

Our goal is to seek prosperity for our clients through participation in stable, growing companies in North America, led by strong management teams that we consider our partners for the next five or more years.

Investment Philosophy

Our style can be described as concentrated, disciplined, long-term growth stock investing. The focus is on established companies that generally have a demonstrated track record in revenue, cash flow or earnings per share growth, with strong managements and solid balance sheets. The current emphasis in the portfolio is on the equity of small to medium capitalization companies, defined roughly as \$50 million to \$5 billion in market capitalization. The portfolio may include large capitalization companies if the right elements are there. Stocks are bought with a keen eye to valuation, so you're not likely to find many high multiple stocks here. The portfolio will likely maintain a significant percentage in foreign securities, providing exposure to investment returns outside of Canada.

*The Wutherich & Co. performance shown here (using the Time Weighted Rate of Return method) is of a composite which combines the performance of all the accounts managed by Wutherich & Co. that have been invested according to the Wutherich & Co. Portfolio throughout their history. These accounts vary greatly in the size of assets that they contain and whether or not fees have been deducted directly from the accounts during their history. TSX-TR = S&P/TSX Total Return Index. Due to its large capitalization nature and substantially different sector weightings, this index may not be considered comparable to the Wutherich & Co. Portfolio. As the Wutherich & Co. portfolio does not compare directly with any known indices, we show the S&P/TSX index only as a reference for the overall Canadian stock market and should not be considered as a direct comparison to what we do.
